

Company Overview

Applied Solutions Consulting, LLC

Company Overview

ASC provides Training and Operational Solutions, Business Intelligence Services, legal assessments, research, proprietary analytics, business development, issue analysis and policy development, and Maritime Intelligence Solutions for government and private clients. ASC's proprietary analytics and metrics are based upon a fusion of business, legal, intelligence, science and military disciplines and ASC's interdisciplinary team, comprised of legal, military, scientific, intelligence, and business professionals, offer our clients a distinct advantage in the marketplace.

Mission-critical work. We understand our client's missions and the challenges that face their organizations. This understanding enables us to apply the appropriate processes and technologies to successfully achieve the organization's objectives within their funding and schedule constraints. We are professionals, bound to our role as trusted agents for our clients, and we maintain that reputation by emphasizing our independence and objectivity.

Innovative solutions. At ASC, we have built our business on our reputation of providing innovative solutions for our clients. Our dedicated investment in cultivating and maintaining contacts throughout the world and identifying novel strategies and technologies keeps our clients ahead of the curve.

Relationship building. ASC has built relationships in key geographic, corporate, technological, and government arenas. Our team's extensive experience and contacts within the U.S. and abroad enables ASC to offer unique insight. Through these contacts and our proprietary analytics, ASC anticipates national and international trends and deliver tangible results for our clients.

Success. Whether advising, planning, managing, providing security, or providing training for our government, corporate, and NGO clients, ASC's focus is on ensuring our client's success. We help our clients clearly articulate their objectives and establish quantifiable effects based metrics.

From complex data set modeling, research and analysis, security, maritime security solutions, project management, foreign market entry support, to austere environment support for private and government clients, ASC provides efficient, professional personnel and superior results.
